Extreme Heat Policy

On days which are flagged by the Department of Health as a heat health alert we will follow these practices:

- All students and staff should bring a refillable water bottle and should take to all classes filled.
- Teachers should remind students to keep rehydrating.
- Any class activities planned for outside should be deferred if at all possible.
- All teachers outside e.g. on Yard Duty should wear a hat and encourage students to stay in the shade and rehydrate.
- Health & Physical Education classes – activities will be planned for inside where possible, otherwise in shady areas. Activities will be modified.
- The Auditorium will be open & a film shown at lunchtime, also F Block corridors open as alternative cooler areas for students.
- Where blinds are installed these should be kept down and windows remain closed.
